Videos ..
(:19).

Rick Crammond 19:03

welcome everyone to our special flight test workshop here on Saturday, May 28 2022. This will be with Mr Kesh of the Keshe Foundation and he will be making announcements about the flight tests. Hello Mr. Kesh? Are you ready to begin today?

Mr. Keshe 19:27

Yes, good morning. Good Day Two as usual, wherever whenever you listen to this series of notices of Keshe Foundation, Spaceship Institute. We welcome you to one of the most important teachings of past decades. Today is not teaching today is to bring you the announcement, the confirmation, the beginning of a new space why It life for men on this planet. As we saw in the intro, man for centuries, 1000s of years have tried to fly or tried to build an object to fly. And he never understood that the flight does not get adopted to be in, because he himself is a fine container, where he contains the plasma to shore up himself. But he's still built aircrafts, rocket propulsion that donkeys use to move him and the car to take him from one to another in a box. Man now has reached a point of the confidence that he can't fly without an object does not need to be within it, because within them is the system multiplied, this is Soul of the Man. Today, we opened the door, not by talk, by introduction and introducing a new flight system where the man has the choice to use his physicality, to use the plasma. So or to use that craft a shape of the environment to carry the choices man, depending on his competence, depending on his trust to himself. Not many space organizations have managed to launch their programs. On the day they promised. There is all this delay. Today, we gave the promise of you system June 2022, to start the flight test, to achieve the flight in 2022. By all the citizens of this planet, as a human race or beyond. It's taken us to develop this technology over 40 years is taken us months and years of preparation to develop the prototypes. The first structure that it can do both you are the captain, you decide how you want to the technology is complete in this first stage. And on the sixth of June, we invite you as Knowledge Seekers as a citizen of this planet, to become the captain of your own ship, in the first launch of the technology. In the past. Governments like United States and Russia became the first to launch a rocket of space technology. Today care as One Nation, One

Planet, we can apply you to the universe where you do it yourself. We provide a facility and once you learn, you can do it yourself or still use the facilities we provide.

Mr. Keshe 22:54

We watch rewriter all of you who are here, from every corner of this planet, to be here, before we went to your nations before we went to the governments before we invited the ambassadors. Now we have invited ambassadors, which is the man himself as you to be here today. You are ambassadors of the race of the man and the nations of the Earth. And we bring this knowledge to you as one nation as a human race is for you to decide how from now on as one nation develop this technology for it. Today, we introduce a revolutionary technology which we have not done released in public, where we use the fields of the plasma and not by rotation or other dynamic systems that you have seen. We have brought the knowledge of the plasma and the matter estate in the dynamicism of the fields of the universe to introduce a new technology, totally revolutionary, never seen and thanks to our team who developed it and kept the secrecy close to the chest, not to go out not to be released and progressively in past two years, developed a decision by stage.

Today, we announced that the new technology is released is released for you that you will see that you don't need a motor you don't need a dynamic system. You don't need anything else. We gave you the basis of this knowledge and the Magrav technology where you stop playing with the fields, interaction of fields Creation of entities out of the interaction of this so many ways. We have put the puzzle of the flight the way the Creator has done The way we came to achieve flight, without interaction with an object, when we see the races of the universe coming to Earth, in the UFOs, or whatever, it means they have not even reached the maturity of the knowledge which the man has achieved today. Now, up to now, we looked into the skies, to see the UFOs and Marvel the understanding marvel that dark head of us today mankind become that the passengers of the UFOs and universe looks up to and marble. Their knowledge, the understanding the final phase of traveling the depths of the universe, as I said, when we take man to space, we won't take you as a slave, a subordinate does not understand, and like a child entering into university. Now the man has become the professor of the University, the game you acknowledge, which has, and will bring changes beyond recognition from all. But we have to tell you a step by step, what it needs to be done, what is being understood. And in that process, we do not need to hover anymore. We do not need to be and sitting and watching that who makes a better propulsion, bigger tank, and then use it for whatever purpose, the tank, the fields, the energy of the universe is within the Soul of the Man now appears to be released at energy to understand it while he bases it to be able to achieve the dream of the new technology, which is released today is not just for flight, it's not just for you, to jump somewhere is adopted to fly. If the wish of the man the sincerity of the truth is to fly, but is made developed, that allows the Soul of the Man to fly.

Mr. Keshe 27:18

The entity is not objectives and more isn't an object, the entity is a field interaction, the present time of today, even when you see the UFOs they have to carry some sort of food that they can feed them they have developed systems to be able to transfer energy into the embodiment of demand. With a new technology, we feed the soul of the feed, the essence of the Creation of the Man that it is high is what to feed it decides where he needed it

decide where to manifest itself. Today, you go to doctors to see where the cancer is today, you go to doctors to see why you got assignments. With a new technology, you go within yourself, to find the cause of the cancer, you find the cause of Alzheimer's, you find the reason you created whatever condition within your physicality, that you become your own doctor, you become your own savior. The new technology allows you to come and to reach this position, you become the knowledgeable of the Creation and the Creator of the condition and not the software after condition. You become not to suffer from hunger, because now you come to the point that you can feed your body without killing, you take the energies from the universe, and then you feed within, then feeding from outside. There is no need for killing the time of killing is when you feel and you feed the Soul of the Man. It will not kill itself to feed others, but it feeds them to work in a perfect direction on dimension. The time of the limitation of the life of the man in the physical dimension, as of today is over, which means you can live forever through the soul after It's you who decides to where to when to manifest yours. The new Enhancement Unit which we have developed in his prototypes and by completion of the cycle of understanding of our team, as you go through it start to put the puzzle together that every man reaches the point of understanding of the work of the system. With a new technology, we allow you to do both Have, you had the option to still fly in the physical dimension, or to fly with a combination of the fields of view, we gave you the Magrav. And you've abused it, we give you Magrav, misused and we gave you the Magrav. stolen. Today, we use the same Magrav technology, as a power supply. As a matter of the energy of the universe, we use the batteries of the man to support the matter estate of the fields. And we put the two together, one to feed the Soul of the Man and one to feel the physicality of the Man If man needs to find we have developed two systems with two different combinations. And these two systems are set and are ready to be tested by the captains of math, which is you on the sixth of June. Within 810 days, we are not asking for delay, we are offering you even you can ride on Saturday or Sunday to this area, no space organization has ever achieved. Because we fly with a knowledge of the Creation and not with the dimension of the physicality of even the time of assembling and connecting and bringing the system together was set to come to this point that the soul of our team was aware of the work aware of the existence and aware of Totality. Now, we have come to the point, we have come to the what we call the breakthrough. Today we introduce a new plasma Technology. Where interaction of the fields creates the physicality where the interaction of the fields creates motion, within the emotion of the math word in the soul often that we create

Mr. Keshe 32:15

the condition that is not any more if you have to shift the 1000 for a few seconds of the feelings of this space, you pay to Mr. Branson, or you pay another million or two, Mr moss to take you to the Moon. We brought because of the technicality and achievement in science, the condition of the flight that more or less every man on this planet, or majority of us can afford it and hopefully will give a chance to others you can become the captain of your own ship, you are invited to come in to test we made it possible is we made possible for us in the Keshe Foundation to cover the development and the costs, we are not asking over the expenditure of what is to come and what else we have spent on it. And we open the doors that every one of you has Knowledge Seekers, to come in to

Captain your own ship and share knowledge with us where he went, what did you see, we believe you because we came to work through the trust of the systems and not through the what we call the lies of we brought the technology into a position that any of you can become the what we call travel of the universe. Or you can go within yourself and find out where the cancer cells or you can go within yourself and see where the hunger is, you will become the captain of your own body from inside you come the captain of your own body from outside systems are set. If any of you can reach the position of balancing the fields of the universe within you so you can fly physically the system. In the test we did in Vienna, some two years ago just before in croner the what we call the Vienna conference, we brought systems into the what we call conference. One of the Knowledge Seekers from Austria managed to stop the heartbeat managed to bring the whole thing to hope that the dimension of physicality did not exist. We were all there witnessed it. We saw the others how they played with the motion of the what we call the heartbeat of the plasma. Now that technology is complete. Now that technology is there reach everywhere, we can place this technology at every corner, you can go to it, if you want to fly with it to another, you can go in it, if you've got the cancer to see what you've done to yourself, you can go into it and feed yourself in the time of disasters, our governments do not need to drop or find us to feed us. be fine. Also, with the system develop, we feed you. The time has changed. The time has come for us to one. I'm proud as a head of educational mission, and the members of what are called the researchers of the Keshe Foundation around the world to announce that the door is open for you to become captains. We welcome you to it. From Monday the sixth, we have opened a process that allows us for you to perfect the system of light, you cannot let the moment fly into space unless you've been trained for months and years before your physicality is tested mentally if you're corrected tested. With a new technology, you enter

Mr. Keshe 36:18

Lin's exhibition set, you have three seats, which each seat is designed with this process for you to be prepared for the space travel. Firstly, is to match to balance your physicality. The second seat is to match and balance the Soul of the Physicality. And the third seat is to balance the fields of the soul. And then this takes maybe 15 minutes, depending on when and how you say you're ready to move on to the next chair. And then from the third chair, you move, you're prepared, you're ready to become a child of space, you move into the space simulation crisis. We call it simulation because it's for you to simulate it. It's not for us with a full flight system. It shows your capability. The first unit you enter is set in different combinations. We allow you maybe 20 minutes half an hour, but it is to say, we won't kick you out of the system. Because if you're half a having dinner with your father, who died 20 years ago, I cannot say sorry, table is reserved next point. We allow you to take the flight offensive, then you move to the next system, for you to understand the position and structure of the flight to the Soul of the Man or vice versa, depends which way you enter the room. And then when you finish the process, you go back again, on the other side to chair number three, which allows you to balance your fields to understand what you went through to, in a way, bring the knowledge you gain to be frozen to be added to your soul to the knowledge of your soul. Then you go to the next chair, which is the soul of physicality, which you bring that knowledge to be shared with your physicality. And then you come off the third chair, which brings you back to the

dimension of the space flight. The training for a split slide has become instantaneous. Go to the Keshe Foundation store and book your time. How many times you want to play and the first 10 applications will fly with us on Monday, the sixth you choose and how much you want to perfect and you might go in and say I felt nothing because it means you are not prepared. Your soul is not prepared to take you there because there's some adjustment needed. Some more understanding isn't it is not a fault is to understand more, to be there to be more. We will see people will come with all intentions and all what we call dimensions with all kinds of expectation to go into the system. I want to fly I want to travel this planet universe. I want to go to the Moon. I want to see no more cancer. I want to see no more hunger. I want to see no more suffering of my physicality. And you have to tell us when you come out and months later, what did you achieve? Some of you will taste dimension that you will want to be there again and again to complete the process of the knowledge of the universe. And to understanding it. In the dimension of physicality, we have given you an option, you cannot fly more than 10 times. We will not allow people to take more than 10 or maximum 20 times to go through the process of adjusting the soul, the understanding and the physicality to be able to fly with the dimension of the Soul, and not the physicality. Keshe Foundation Space Center in Linz is open for flight from today. You can book your ticket and say how many times you want to be there. And what do you want to do it, we give opportunity to all men equally from all races from all corners of the world. We, as we learn, as our team learns more as you come out of the system, where, what and how we adjust the system's for next three months to get to the optimum that we understand the collection of the race of the man,

Mr. Keshe 41:22

your Chinese, your Indian, your English, or your from South America, each come with a different understanding and intentions. That's why we set up the Universal Council. When you go to these machines, then we have to adjust that all of you, irrespective of your color, race, religion or belief, go through the same door after completion, that you become a sponsor. And this process has a subject, we are proud to announce that all of you can become the captain join us and enter a new space technology without fuel. But the interaction of the fields I've been telling you for years, don't look at the Magrav and whining, look at the fields which creates and the conditions which creates. Now these Magrav apps will feed the space flight simulation units because we use the fields and not the matter of state I told you I gave you one of the most powerful generators in the universe. But again, you looked at the crops. When you enter the test flight room, it to the side, we have not put the test rooms on the roof that you can take off, we have embedded you in the most concrete blocks that you see how you can fly out of the shackles of the Metro State. This is the beauty of the new flight space. This is the new way we have done. This is why we called to these workshops. This is your workshop. This is where you entered the zone of the time and space travel from all over the planet to join us on this adventure. It's you who build the part of the knowledge which our team will put together that the mankind collectively will fly. We are not planning to be a systems out there is for you to plan to be to become and become the first people on the sixth of June. Maybe you land on the Moon. Maybe you bring us the dust of the Moon in you. And you're saying I've been you go to Mars, you go to another galaxies in the time you're in the system. And you bring back with your physicality, the dimensional existence will you

be bringing us friends from different parts of the universe? When you come back? Explain to us what you have seen. We believe because you are the ambassador in Manatee that type space and position. Man went to the Moon and two pieces of it brought it back. And when I was a young boy was given a little pieces of every nation to prove that the American had been on the Moon. I remember going to what they call the answer the squaring tower, the white building, which is the center of the manifestation of the technological development and beauty of Iraq. I went there to see this tall at a young age because I wanted to see the man has been to the Moon and brought in evidence. But again These are 40 When I went back to Iran 50 When I went back to Iran, by the invitation of Mr. hamady, John, I went back to the same building. And I asked the guy, the manager, where is the stove from the Moon. He said, That was all wise. It's is the being. Man has never been to them. I walked out of the building. And I said, Where does man has gone? Who lie and who is lying to himself. I saw the stone in my own eyes at a young age. And I said, I'll take the, to the Moon. But it doesn't need to bring just for somebody else to see, but beings for his own soul to receive the confirmation of his own achievement. No man can back. When you go to the Moon, bring us stones brings us the sacred life back, for us to understand, to educate ourselves how to live in this environment, without the monkey suit of the space.

Mr. Keshe 46:23

When you have a dinner with mom, being part of the food for your children, that the grandma wrote, you said you that the food of the soul needs to be you've changed it to the dimension of his physicality. This is not a dream anymore. This is the reality of the facts, which sits in front of you. And Trump today is open. You have never seen the space reactors. When you enter into the Spaceflight room Tehsil we do not allow you to bring any electronics into the building, you're not allowed to bring any mobile phone, any cameras or anything. We cancel your presentation or your flight if any ball rules is broken. We don't need evidence to believe we trust your word to believe that you being a new dad. And we will share your knowledge when you come out. We record the flight systems we record your emotion, we record everything that the others to go in they know what they might have to do or might have not to do or what they can add to to have a better, faster flight in a way when you walk into Linz next Monday as the first 10 People you become the what are called plasma nodes of the human race, you become the motions you become our ambassadors to weld

Mr. Keshe 48:11

it's your responsibility to behave good, to be good and do good. When you arrive, we travel the Space of the Universe, the ethos of samsara.

Mr. Keshe 48:30

We become the Mozart's with the love of Meech.

Mr. Keshe 48:45

We share the knowledge of the universe, not only with the human race, in your travel, you might go into places from Malta that you share the site. You become the ambassadors of peace, you become the ambassadors of the knowledge and you become

ambassadors of the Creator. Use the knowledge wise, share the knowledge wisely. And don't let no nation and no race and no one in the universe or Earth to use this knowledge to harm that you wish peace during the system while you're in it more within the soul of the more leaders elevate to that the change is more to the soul of the lion that shall not kill just because he has the power more within the structure of the stall to flower that he shows his beauty move in the direction that you could never imagine. As I said, I will be who I am not change for nomads as I can to bring the knowledge of the universe to make man, the Jew in the town of the Creation as Mitra love when you love someone, when you make the crowd, you give it the most beautiful stones on the top, the biggest jewel and the jewel of this crown is the human race and the ball to that point, because the love of Beto Cup of Man beyond the image

Mr. Keshe 50:54

sharing this knowledge has taken us a lot of hardship for me, and those around us took a lot of persecution and suffering. But today's standing here it was was, he had to go through that, to bring us to this point to end with a kickflip as the key now is a sought after, to end the wars, as the man has just stopped the war with himself that does not create an opposition. There are a number of Knowledge Seekers, which will never be allowed to enter the premises of the Keshe Foundation does not matter, as the soul is so black, that it can change that mention of all artwork. There are a number of Knowledge Seekers, which would not be allowed the human near the center. They know why. And they know the reason as we test them, and they fail the test over years one or Knowledge Seekers who will be greeted with open arms. There are Knowledge Seekers as the world leaders, (:52). who will come in, and they will walk away, till they find a way in what they've done, and how they have to do, and they will walk back into the position

[HERE >>>](#)

There are many of you could walk in as a man, and you walk out as citizens of the universe. We have blessed souls who have been amongst us, and in a way, in the background have been through the Soul seeing the transition. The blessed souls people like Rick. Those who sat with us, amongst us, and went through the whole lot. These are parts of the structure of the souls, we brought with us to see this development through.

We sit on the seat of justice, we sit on the seat of equality, and when you become the ambassadors of this planet from next week, when you entered the zone, and you enter the systems, your responsibility to human race, to yourself and the citizens of this universe, is the ethos of Zoroaster, think good - to add, talk good - to elevate, and be good - in a way that everything turns out good.

The cycle of the progress of the man is complete. Now it's what we call, polishing it, adding to it. In the systems when you enter, when you come out, you might speak a different language that nobody has ever heard. Because this is the language where you went, that's what they spoke, and you learned it instantaneous. (:54).

You might go in the system, speak French, and you come out speaking Farsi, because you wanted to be where Mitra came, that was your wish, and you learn it instantaneously. This is part of the education which we have brought in. This is part of the work we have brought in.

I thank the work of the Keshe Foundation in Austria, the beautiful soul of Klaus, the way relentlessly saw, the whole progress and development of the technology step by step. These are better souls, which will be brought with us to complete the cycle. Their physicality does not count, as it is a cover for the beauty of the soul within. We bring the systems, new technologies in the coming time, that will change the pattern, the structure of life on this planet. As you bring it, as you add to it, as you as the citizens of this planet, decide what is best, for the ant, for the tree, for the fish, for the man.

The planet Earth will become a beautiful haven for the citizens of the universe, not to enjoy the beauty of its physicality, but the sincerity and the purity of the souls, which live within it. Now you understand why Mitra fell in love with Earth. Now you understand why the knowledge of the Creator was released to mankind, as she fell in love, not only with the beauty of this planet, but with the way the man loved, and she always wished, that the Creator would love her the same. Now the children are Mitra, are amongst us, and they'll bring a new cycle for man.

It took one man, as they said, from Central Africa to become 7 billion of today. (:56). The life of the cycle of the children of Mitra, has started, The new race of man will be created, that will bring the wishes and the love of Mitra. The beauty of the Creation and created from every corner of the U.

We called you in today to tell you, that not only the system is available, but you are the captains. Join us. Fly for us. Become our ambassadors, sit with us, and change the man's world leaders.

I want to know how many of you going into the systems from Monday, will move as a true wish of you, into the dimension of the Soul strength of the Putin, and Mr. Biden, and president Xi of China, and other world leaders, to bring them on the table of peace, at the level of the Soul, and not at the level of physicality, that at the moment, they can't even fly to see each other. They make threats, on the voices of physicality of the Man, when you make them to love each other, on the love of the Soul of the Creator.

Now, the position of technology is very clear, the flight systems are not going to be built, they are built. Very simple way. The enhancement units (EU) you see on this picture, is not what you're walking into. You're walking into the field structure, which no tangibility of the solid material, (:58). can confine it. In the future, even these structures will become fields on their own, without physical structure. In a way, we embed you among the stars, that the collective soul of the systems, with the STM will lead to the maturity and understanding of the creation of universe.

These systems become the womb of the mother, and the Soul of the Man, at the maturity of age, and physicality becomes that soul of the child. We allow you to grow within the womb of the mother to obtain physicality, maturity of physicality, to start the life on this planet.

With this new enhancements centers, and Space Systems, we take you back to the womb of the universe. And we teach you how to mature that soul. In one word, I welcome you as a human race into the dimension of the world of the Creator, and not the Unicose, as you, once you reach the point of maturity, become part of the Creator, that leads to the Creation of the universe and Unicose.

I'm not a talker, I'm a doer. And now we've done our job. We brought you step by step to technology, the understanding of interaction of the fields, the MaGravs, the dynamic systems, the Gans's, the showing of the flight and the control of the environment through the Iranian defense technology of what we saw captured. We have brought more and more. We have brought more, that you will learn more in the coming time.

Please understand that by entering into the systems from Monday on, (1:00). you are the captain. And you are the ambassadors of the human race in space. If you're worried, "to let me fix my physicality first," and go to see if you can feel yourself, find a way, that you don't need to eat food anymore. That's your prerogative. If you suffer from Alzheimer's and you go into the brain to find out where is the disconnection, that's your prerogative. You have your 30 minutes of fame, as they say, in the machine. Maybe you need 30 seconds. And then if you suffer from the conditions, that have paralyzed you, the conditions that have put you on the live threat, that is your process, is your honesty.

[HERE >>](#)

The physicality does not want to have anything with a soul has given you the cancer. Because this way it can justify its condition. We are not there to decide. As I said, in this fight systems, no toilet, there are no feeding sections. There are no confession boxes, and know where to go. Except to the Soul of the Man. You might walk in and say nothing happened. Because this happens to those who are ignorant to confirmation of their existence. So I appeal my walk with a lot of excitement. Some of you might go through the condition that what have I left myself open to when I did not listen to mother when she was alive, and now having a lunch with her. In the coming weeks, we will add to the number of these units primarily around the world in Keshe Foundation Centers. And then we'll build on it to make it gradually to the dimension every nation have a system. I came here 1000s of years ago to develop this system to mature them. But we understood man has to mature step by step

Mr. Keshe 1:02:18

from hunter and gatherer to understand citizens and big cities, then to create a new communication systems, then understanding by then we taught you about the fields. Today, we give you the field of the space of the years. Join us as fast as you can learn from it. And then take the knowledge to see if through the learning of your souls. You

can teach your nations we can teach others in the universe. Many of you will find out when your system you're not the citizens of this planet into us. I promise my Creator that are being free don't put those who became exiles from other points of universe on this planet. And with this system, we give you a chance to return home to find home and find out what happened to home. And if there isn't hope. And then instead of being locked in the physicality of the murder on this planet, which is suffering a bit, you decide to move to another position in the universe, where there is no suffering there is no need for all the hullabaloo which the man has made and the appeal will come to understand you have been guest amongst us within the structure of the human race structure. We give you that freedom. And thank you for being a guest with us. We hope to see you soon we hope to be that dimension that we can meet again at the levels of the souls Creator and physicality of donation. That said many times to a large percentage of the people amongst you and so are not disciplined. Now with this technology, we give them that freedom to go back or to choose a new place not to suffer in dimension or physicality of the system is not developed just for them. This system is not just developed for you to go into sick and get rid of one thing or add something else. To IT systems are built to mature the Soul of the Man the fields which creates the magnetic version of this category. I'll be there on the sixth of June, to welcome you first. Please do not turn up if you have not received an invitation with the hope that you will Get it. Please work with a Keshe Foundation team and follow the time and schedule you're given to be there. If you have chosen and multiple fabric or chassis, make sure you saw that all your recommendations, and you were not a burden to us in yourselves. We opened the doors, a test center for all of you, we add more and more, our production team was working literally round the clock. They are night. And the head of the production, artificial relation, manufacturing class sometimes doesn't even sleep, making sure every aspect is covered, we have put in the manufacturing production line, which we see we should be able to reach to be able to add two to four maybe units a month, and that are the mass production, with collaboration with corporations, which we trust governments which you trust, with the government of China, with collaboration with business, you have China, establishing a new institute in China, with work with our team to build a situation in Arizona with John, with us up into how we work relentlessly, to build the first of these systems to be transported to Nigeria to Alex to bring the freedom to Africa. In the same way, Rafael in South America.

Mr. Keshe 1:06:44

You can join us be part of it and add to it. We still are entangled in the Division of physicality. And we have to be able to create that ambition. And the moment we allocated 10,000 hours of flight test, which means when we reach the 10,000 flight this video as Knowledge Seekers, then we look the need to adjust in the follow up system. And hopefully by September or October, we reach the point that the systems can be specified in a specific way for flight destination point flight, what we call enhancement soul point systems for what we call medical and health applications and systems for feeding and what we call cultivation. Man will not need to cultivate but do they enjoy it. We don't look at and looked after a rosebush just because we're going to eat it. Look after it to create as the beauty of the flower creates. Now human race reaches that point. Everything is done to enjoy the beauty and not to consume the beauty. This process has

taken 1000s of years for me to complete now is completed. Now it's where you as a human race, and those who are your guests to complete the knowledge of the universe

Mr. Keshe 1:08:29

in a way, I have done but I still keep an eye on the demands of not making a mistake. Anyone uses this technology which is released from now or harming for wars, and for any other application will bring them to the solar those Knowledge Seekers that will never be elevated. And our spoken word is very clear. Noma is allowed. No one will be allowed. No Creator Creation will be allowed to use this knowledge which we have released to harm others. No being is allowed to bring the suffering to another to this knowledge. I agreed with Iran using the technology to capture the drone. I disagree with Iran to use the storage in rockets to destroy bases where the human race lives in it. Advice to the hauling appear on the Iranian leadership to withdraw from such an action. Otherwise, I have to take the steps against the wishes and deprive this face of the knowledge gave you a gift. Use it wisely. Share it with the Americans, as you do with the Russians. Share it with the Chinese as you do with the Nigerians and the Brazilians. We gave Iran the first gift to become the leaders in peace, not to create another cycle, we do what we like and nobody can touch us. I do not agree. My advice to do menial support your readership is withdraw from this pace of work, as you bring change to the race which brought the knowledge.

Mr. Keshe 1:10:40

Go back to all of you. Try when you're in the system, to reach to the Soul of Christ. If you're a Christian, try to reach the soul of Muhammad bless his day, if you're a Muslim, try to reach the truth for Moses, not the Moses as a reader and a killer. And then satisfying that you have seen what you loved through him, see the love of the creed, and bring peace to your soul, and the humanity that told you or bring you to the condition to see the Christ with your own eyes, it was with your physical eyes, was in the eye of the Soul of the Man. And now in new systems, you have the opportunity to do that. When you come back, when the Pope says something, you say I've been with Christ, there is no such thing. And I'll take it to him. Because you have from now on that opportunity. If your wish is to see the beauty of Creation, to that the reason we offered you 10 or 20 session is for you to satisfy different dimensions of ambiguities, anxieties and lack of knowledge or extension of the knowledge which you wish to have. Is not just going in there and coming out oh, I've been to such a such a place is for you to nourish your knowledge is for you to understand the work of your soul. And it's for you to extend it. I thank you for all of you as Knowledge Seekers been with me for years. I'd thank you as Knowledge Seekers, in so many ways to supper with me through the human suffering thinkers, Knowledge Seekers, to be as part of the souls which we brought in different shapes and forms to bring the whole of the, what we call human race that lives on this planet. And the rest of you only risks to the beauty of today. Join me on Monday, the sixth Keshe Foundation in its I'll take your press 10 through to understand, to know what you're doing to teach you the ways. If you go through the system, maybe twice one day. And you'll see the elevation of the soul the understanding of Totality, and return to its membrane. Then join the Keshe Foundation in the structure change. Join us to bring peace to mankind, to allow us to bring the knowledge and the beauty of the new

technology to one we have in so many ways. I have seen so much hardship. And I have seen so much pain when it's time to change

Mr. Keshe 1:14:16
it's time to show the beauty of meat

Mr. Keshe 1:14:25
it's time to show the beauty of your masters. You've been trained long enough on this planet to know what suffering is. You've been trained long enough to understand what the beauty of now is. And you learn this when we assess to make sure the other citizen of the world universe will never experience any pain. It's your responsibility to curb to stop and bring change even into new races that every day Add Time created amongst the stars, and galaxies and groups is your responsibility to become the nomads of the Unicos. To make sure that life from all it always starts with the beauty of the Creator, Creation, and no suffering. Otherwise, we have wasted our time teaching you all. Thank you for being with me. I hope to see you so the first space my center, the depths of the Earth, and not on the roof of the man that he saltation said when you go into bed, many floors on the ground as a minor. Your soul still travels beyond rocks above your goals to see the children at home. While the father isn't if something might asleep. We have brought you that not only the blanket over your head does not stop dreaming, in order to emotion of physicality up the building you're in it. And not even the restriction of the atmosphere of this planet. And now with a new knowledge, you decide where that's all going rolls in the Unicos said, bring us back that stuff the variable, a feeling of the love of the law, that we add to the knowledge that how we have to live and how those who try to go in the direction of physicality will fly. Thank you for being here. And I welcome you to nose cipher off the line with the fields of the universe, and not Propulsion Labs. And the rocket technology which you saw home to achieve. Flight and merge did not manage to go very far. Oh, you understand, you have to see what damage you can do to yourself and what achievements you can reach. Thank you very much, Rick, for today. And thank you very much for arts in Austria. And those who kept the part of the Keshe Foundation applying, they will come the messengers peace and unification of man and the Unicos. Thank you all to be there previous to this point. Thank you we're going to a small break within Huntsman unified system. We come back to answer your questions and then we meet you on the promise to the sixth of June. One day I will explain to you why I chose sixth of June is the day when I met you know

Mr. Keshe 1:18:19
And strangely enough, sixth of June 2008 is the day I returned back to

Mr. Keshe 1:18:30
sixth of June is celebration of the manifestation of Mitra. With physicality of acceptance, the life of the man is the birthday of the acceptance within dimension of physicality, or Mitra within the parliament of the human race. And then you understand why we chose six is tied to completion, transportation and teleportation of science were completed How did I know the sixth of June will be some months ago is what I promise if I do I want it to

be the change. I came to bring the change and when I returned back to you don't change your attitude or go to a break. We come back and we answer

Rick Crammond 1:19:35

Okay, thank you mr. cash. So we'll be back after a short break and have an opportunity for questions and answers.

horizontal enhancement spaceship unit 1:22:03

The new horizontal enhancement spaceship unit, a space technology that allows you to work with the fields of the universe, creating a wide range of plasma field interactions and conditions it allows the body to process itself from any physical or emotional imbalance. Once this balance condition is achieved, the Soul and emotion of the Man can follow to find their balance, elevating the whole of the man the new horizontal enhancement spaceship unit technology of the future through advanced plasma knowledge.

vertical enhancement spaceship unit 1:23:04

The new vertical enhancement spaceship unit a plasma space technology to prepare humanity for transportation and transmutation in Deep Space. Essential processes are embedded to prevent mutations and psychosomatic conditions during deep space travel. This new system is designed to support upper body conditions especially of the lungs and intestines and can be targeted specifically for each organ. When inside the vertical enhancement spaceship unit, the body experiences balance in Totality, enabling it to correct and rebalance all the fields within itself. The new vertical enhancement spaceship unit, a dimension health and transportation never seen before.

Rick Crammond 1:26:46

Hey, welcome back to our flight tests announcement workshop here on Saturday, May 28 2022. Okay, this is the part where people get to ask questions of Mr. Kesh. I remind our attendees we have quite a few here today that they can raise their virtual hands and then we can allow your microphone to open. Mr. Kesh? Are you ready to begin?

Mr. Keshe 1:27:22

Yes. ready, willing and able, I hope.

Rick Crammond 1:27:28

Okay, well, we have a hand up here with Paulo. So let's start with that. Hello, Paulo, can you open your microphone please?

Rick Crammond 1:27:50

Maybe it was a stray hand. Okay, well wait for Paula.

Rick Crammond 1:28:06

As are mentions in the chat, if there's any Farsi speaking people, they have a question they can ask in Farsi. And Mr. Kesh can answer you in Farsi. And we translate if we need to. She says thank you, as our

Rick Crammond 1:28:36

we have a comment in the YouTube from a Thank You mr. cash, I'm afraid that the person said or heads of state or heads of companies or head of whatever, have no empathy and just the more achieved forms of psychopaths and greed.

Mr. Keshe 1:29:02

Thus, not the exclusivity of the worldliness and exclusivity of heads of cooperation. It's now that we have the systems now that we can show you the way it's your responsibility to reach that you didn't know how to do it, you could not do it. Now you can. Yo you have the facility to do. Now you have the possibility to do. Well, when you have a cancer, you're steered in the direction of in your body and you do something with it to change it. These are the cancers in the world of human rights. You have to do something about it. Man has never stopped creating cancer with his body by evolution by emotion or by accident. These people become we have it within our Knowledge Seekers is not that just because you became a Knowledge Seeker your soul and it's just the industrial or leadership This is the part of the problem today now with a system technology you'll have a chance to learn to become an ambassador to find that strength of the each one to innovate and from inside

Mr. Keshe 1:30:38

Russian intelligence used to have a beautiful system and they had a beautiful ethos if you cannot get to some of these world leaders, this was done reliably in the Taiwan report which apparently was to find the taste of the man in the woman who likes training and then put her into water in bed with a reader and then you can influence and you can inform we don't need to do this we need to understand why the soul of Davoli that sort of industrial looks in such a way in the dimension of physicality

Mr. Keshe 1:31:32

understand for it to bring it back to the position and you will become what I call that become that Mr. It's in the soul to elevate the Soul of these people that change the direction of physicality

Mr. Keshe 1:31:57

all come into this you have to take that step and it is a lot of work to be done in all dimensions has to become ingrained in the ethos of them not forced we could of course where they would have jumped either guilty is like trying to get a cat in a bag when there is another poll she can make to jump out we have to make the cat to feel happy to be in doesn't wait to jump and this is your job from in Universal Council member and reach the Soul of the World Leaders because this is one of the beauties you can come as Knowledge Seekers and Rita is not up to the others to do it anymore. And wait is your job to do it is no time to wait. I seen one of the questions we just put in the if two people can enter the system, the flight system has been made for two. It was wonderful, wonderful about couple of days ago and then we said okay, can we have two and yes it's got to be to at least one of the system have two seats. This is important to see if you take as a captain, your passenger to where you went to when you go to mom. She doesn't go to

her mom. We both go to your mom and then we both go to Burma. So yes, we have for seniors we have to learn from this and you can do intervals we have facility for in spaceships we can accommodate more. But as I said we have to do this step by step but it doesn't become a magic that everybody understands everybody works on it everybody can see further. I hope many of you have made the Magrav and you're waiting for the power supply deduction. Now you understand the magnets are in essence for elevation of your soul in combination with a system energy system out there. Especially if you're bringing your partner bring your child has to be over the age of 18 Bring your mother you're going according to see that passed years ago. I see report and I'm in the same place or none of you will feel it They never seen him because his intention is that he does not want to be he's not ready for that account because he has no control to come back into that emotion of physicality but you are the mother anyway of dimension of his culture to be reduced to the low of touching your physical is too much that the soldiers have except maybe you entered with the wrong which maybe you don't merge together or we're gonna do this or we go in it together is not a competition is agreement of the soul

Mr. Keshe 1:35:50

we turn to standards come in as what bring your lover to see actually if they allow it it is what is going to last you a lifetime lover and not just in the emotion of physicality. If you have actually found your soulmate it is one of the beauties of this system and Knowledge Seekers asked me would you go into the system, but I said if I go up or not come back

Mr. Keshe 1:36:36

even my physicality will not be there for you to our uncle Melinda dimension position and I know my responsibility and entire I know in so many ways we try to accommodate we try to see we try to build from one passenger to two and to many that are captains learn how to handle other souls which are interested in like the captains of the planes up to give you a physicality entrusted to the captain and it takes that position

1:37:32

Hello, Mr. Kesh? Yeah. Any Chinese here they have some question. Yes. One question is, is that June 6 is the day you need to Metra neutron first time

Mr. Keshe 1:38:02

is June the sixth is when we got the agreement or consensus of agreement that Mitra accepts the solar and the solar diamond dimension acceptance yes

Mr. Keshe 1:38:28

it's very profound the many of you in mutual understanding these are not all coincident is the sixth of six

Mr. Keshe 1:38:50

as part of the backwoods of the system

Mr. Keshe 1:38:57

you will understand in the future that that number six has a lot of meaning for the cycle of Mitra and offsprings other life one day I remember, problem six

1:39:27

Thank you, Mr. Cash. There is another question is that to use the system to have the space travel is that people can really bring something Yes, yes. Yes.

Mr. Keshe 1:39:43

Yes, you can. Actually, the system design allows you to convert energies into matter. We designed it the enhancement A simulation is actually a craft is not a simulation as we say it is the way you evaluate the condition to learn. But it's designed if you bring something back with you which wants to be in the dimension Kameena no mention of the fields of the Earth. Yes is the knowledge with the material matters stayed in husband unit. It's the same knowledge is not something that is something we just dream about. If you look at the pictures de Enhancement Unit is a material Enhancement Unit if you're producing in China, you're the head of education, you know, how its manufactured, the unit is designed to convert energy into matter. This design is has been adopted in the new system, that if you come back with a matter of Stata, that wants to be here can exist in the dimension of fields up to Earth, yes, you can. As part of design, if you have a piece of shrapnel in your body, and you know it, which is dangerous for you, but it's been there, you can go within it and take it out as a matter of state when you come out

Mr. Keshe 1:41:30

this allows you to do this is the beauty of the new space. If you're hungry, many of you when you come out, before you go in, you're given a bunch of questionnaires to present at every stage. You're not just you go into the system, what we want to know what you felt how you went through it, that when you come out these questionnaires will be collected from you and read the contract is binding stays with the Keshe Foundation and then we add up we put these together underlines what the data means what which part of the system we have to change the new system in the test center is not rigid like the reactor the husband you need see is flexible. The way is designed by our team you can adjust position of the reactor is slightly if you see people come in but they cannot transmute or transportation of the fields to the matter estate we adjusted where we are wrong we are very flexible standing structure that we can suit it if one of the reactors needs to be the condition of the Moon, we put you in there develop it and then you see the condition of the moment you are there how you don't need a monkey suit to live because you just you saw before you go now it's not a dream the systems are in Austin the systems are immense is the joy to see and thanks to Heartway the whole of the Keshe Foundation to around the world in different pieces that knowledge has been put together and you see the collection of the 1000s years of the knowledge also brought us the knowledge of the material dorsal proton Sun knowledge of the energy transfer in matter said the solar TESPA and the rest in dead sea one day with the pictures or the Tesla and me next to each other maybe understand what songs pass same

Rick Crammond 1:44:24

time okay we have a similar question in the YouTube and in our chat here. A YouTube from see Holter I love to participate on the flight tests on June 6, but I need sponsorship for that. Is there any sponsorship available for a uni student like me? And from bond office in the chat can the Knowledge Seeker from low income countries like Kenya who can't afford the ticket, joy ride without pay and explore it

Mr. Keshe 1:45:00

Have we considered at the moment the whole purpose is to push through to gather as much knowledge and information from all races and Keshe Foundation has done a lot of work in trying to bring equality and financial position where the call public status does not affect as many Knowledge Seekers who can support you

Mr. Keshe 1:45:40

there's a continuous chat

Mr. Keshe 1:45:48

by the Iranian T but Iranian Knowledge Seekers I would like to thanks explain to the prosecutors who are present the rest that will reach you to the knowledge of the language is not the mat

Mr. Keshe 1:46:22

there's a gentleman called here everyone is Mr. Mahina COVID Is that he has a question to ask would you like to bring them up? Is originally poxy he cannot speak English you see

Rick Crammond 1:46:52

I ah okay shows up as guest instead of everyone in the with a hand up here I believe so yes. It seems to be the same Farsi name or whatever. Yeah.

1:47:10

Suddenly port for some sort of cinema Shabazz hairbrush Apophis oxtail. Akash Halima another button so where are you at eg KSR is one but over the shoulder is your Domina kibbutz Nam hos ranch tomorrow. There are some people for software Bahati give Octavia due Sunday afternoon I share your why should I share? My camisa Bonomo zifa as a module atone Agha Lord when it was rated best ever Maka said that had the change only the monitor so that I can share the year to Z was mobile family.

Mr. Keshe 1:47:44

Man by just outside your charge ambidextrous FRC medium so what was your

Mr. Keshe 1:47:59

children, Mr. Club is asking if I can address the reunion audience and the reunion Keshe Foundation in Farsi I explained to them that in the coming week, I will be going to the venue policy channel or teaching with other Hassan to explain in more detail. We will attend from today, a fire rotation of your teachings to every channel. I will attend the American teaching tomorrow night or attend the Vietnamese teaching next week in the

German I attended yesterday to invite them to the meeting of today, I will attend to see them again the same in every language workshops. I'll try to attend on Wednesday with Rick's teaching to bring more explanation to those of you understand. We have opened Pandora's box of knowledge and we have to support it heavily. And I'm sure we can do so. We are trying to attend and be present if you send me that what we call the legs and the time and the space is there to attend your teaching to answer you in your language the Italian, Spanish to Portuguese, I was attend 100% And this Friday teaching now with Raphael. And we try to explain because you have to understand what is calm is not exclusive. They are English. And this will take shape the scene right across the Keshe Foundation. Return if the Chinese set up a program for it to answer to the Chinese community. We have been as requested or invited either way you put it with a Chinese government sort of military people who we know in the past week to open a Spaceship Institute in China. response to the Chinese government authorities, (1:50). and people who have approached us through military or been close friend to us, in the rank of generals in the Chinese army our responses positive punishment they sure will give support the beautiful structure to Chinese leadership. I supported Chinese leadership for a long time because I believe in what is done the way the correct way, even though it doesn't look to some of you outside. 10 We will establish Institute within but invitation we haven't seen from the Chinese authorities will need if you want to elaborate on that. Or you want to keep it as it is.

WL; Yes, Mr. Keshe. There are some

K- Don't go to detail. So do not go into the detail, please.

WL: Okay. Yeah. So what do you want me to say?

K- Is don't release any names or positions?

Q; Yeah, I know. So actually, they want to invite you to set up an institution in our academy Shing harbor in its beautiful place, they have like all invited to all the scientists and academicians especially as the title of academicians from all over the wall to have like a lab in that area. So they want to invite you to set up a lab in China in the academy she'll have

K- Can you explain what akademischen is in English language? We don't understand it the way you understand the Chinese (1:52).

WL; Academy show is the is a is a title in China actually, it's like how to see experts excellent, far beyond the experts. It's like the most highest scientists, or research in China is in some institution can get that the name

K- Thank you very much as you heard in terms of mass General, that we respond positively to open an Institute. This knowledge has to be shared with Chinese they are the old culture, and understand the essence of the interaction of the fields. Thank you very much.

Any other questions?

K- .. Please those of you who want to participate, go into the store application of KF, you have an option of one session, five session, or 20 sessions, and take your option. We foresee for next weeks and months to be fully booked. There are many people who want. Some of you might come for because you have a desire to see the elevation of your horse when you come because you want to stop eating a new pie in the way to feed yourself to do so. So, have you come because you have a dimension of what we call health problem. Some of you will come that because you have an emotional problem come in yourself. And let us see how this system is built, (1:54). is for one way or another what we learn from this will go into the structure of the physical habits that a man is basically designed does not want to travel normally shop so we can perfect system

that they can we get rid of the cancer in the space that can be get rid of emotional problem and especially can we get rid of the hunger space?

This is not for you just to come in. You are test pilots. And you have to report back what you saw in the test. What you learn in testing and share it. This is the whole purpose. It's not just that you come in to go through the enhancement center and go through the system is for us to see how correct we said system, how better we can make it and how efficient is why you go in and you don't feel anything. What have we missed? Which strength of the fields we haven't built in while you go to the Moon Wanna come back? Can you bring maybe some Dustin noticed? What do we need to adjust?

We know you cannot bring your father back would like to purchase from this clear, clear. We do not allow, we have not we cannot allow the resurrection of the body. If the physicality and the Soul are separated. The only reason we can come back, is because your Soul and STP are together.

So we want to understand more, we want to understand how you can see, a seed within the stone, that you can have a flower, and it doesn't happen and can bring it out for us to see how it's done. A new knowledge, a new dimension of understanding has opened up. (1:56). None of you are magicians, we have created a condition, for you to create that magic, that we can explain that there's no magic. It's just that we have to understand the process.

Many of you will bring back with you passages of the space. I promise you many of you will come back falling in love with other creatures, and want to bring them here, because you want to see them here, but their fields do not match this planet. It's our job to make that fish tank. That we don't make them a prisoner, but instead if they want to come and visit, and then to go. There's a lot to be added to this technology, a lot more. But we start with a small step.

K- Still no, maybe have to ask your soul to speak.

HERE >>>

WL: Hi, Mr. Keshe. I think China's today they are very active. Although I say Chinese, are very active to ask a question today.

Mr. Keshe 1:57:24

Can ask us the question what Paulo is trying to fix this one?

Ruthie 1:57:29

Yeah, um, one rabbits did ask when when we do the soul traveling to the destination? Is that possible? He was there for a long time. But when we come back to Earth, it seems just to zero seconds.

Mr. Keshe 1:57:48

Pardon?

Ruthie 1:57:51

His means if he arrived in, in a destination stay there for long, long time. But will he come back to us? It's just a seems like just several seconds passed? Is that possible? Yes.

Mr. Keshe 1:58:05

Yes, it's not possible is that reality. I have asked the Keshe Foundation team to not to disturb when people are in applied condition. Replace two lights in the front of each test. When you're near 30 seconds, you put the light on if you like to terminate, or say goodbye to Papa, I have to go because you accepted the responsibility by emotion of physicality. 30 minutes, be it if you take longer, we can't drag you back. But if you see abuse, we surely do. But in essence we put happen you might have to five minutes be so much content when you come out. And then you go for another session a few hours later because now you can handle the emotion did not expect to really physically see your mother in front of you. Now you do. We have Knowledge Seekers who have been through this and they said that the mother father physically as they are present in the consult or the problem of the past. They cannot talk when there is clarity and their point of view it's all up there is not a fairy tale that if they want they can come and explain

Mr. Keshe 1:59:40

we set the time but we will not separate the solar from the solar physicality. Well, maybe it's too nice. I want to stand up going back. Sorry, excuse me. We only have two systems at the moment from Next time, come back on the next session to understand more fine. There's so much with this new technology that men cannot understand. Y'all can enter, somebody asked me to help us go into some drawing as a husband and wife. Now that you can create the children of manual location of the Solar System, create that child within the system understanding the interaction of souls and then you come out in cycle of the life of moments, moments later you will have that chart. But now, the seed of the soul is first and then the physicality takes shapes and in the water. This has been done, it's not very take

Mr. Keshe 2:00:58

there is so tapes, about to come. The beauty of it is man now can enjoy bore to damage the canyon. And this is what we want. If you want to still enjoy the beauty of the poker, you still want to enjoy the hands on the software you love, you still want to enjoy the beauty of the trees and the flowers and the animals the sound of the bird. That doesn't happen in the dimension of the Soul. You want to hear that you elevate your soul. Now, with this new technology, we give you the chance we create a new race of the man you are not aware of for approach, you haven't even touched the surface, let alone going to the depth of the knowledge.

Mr. Keshe 2:01:56

This pile of ready to go? Or do you have any more questions from Chinese? I have to take the Chinese community you stood by us very solid. I took the Keshe Foundation into most hardest part in class eight, to create a condition that they can become the process of a lot of things. We're all up here around the world. And a few days ago, I said one of the Knowledge Seekers, you know something and become a man. I'm trying to clean up the mess up the man in the past is suffering and the new knowledge which I brought and completed, that the management is so doing in the factories do we need all this hullabaloo and the rest of it that I have to suffer under those around us and especially the Chinese we strive to bring a change but in a way the change had to come through the technology and the knowledge and also comes up in the committee. I've had the one of the most profound experiences in the past six or eight weeks, you know, understanding that within the Knowledge Seekers, the totally different people that we see them in damage. Those are all sincere and those who have been there to benefit in different issues. And those are there to serve to bring the change does not matter what comes I think all of you have in other condition whether it be brought up understanding which will be put into it. The beauty of the new system is that we build emotions into the system it has already been built. And in a way has come with the touch of the people who build the system with a lot of love and care and their emotion which is passed on into the system that become the backbone of your wedding or in your learn sincerity devotion you learn from their soul is their fingerprints on it. The love to bring the change. It's an amazing process. It's an amazing process of your fingerprint is not just not just the transmission of the essence of the emotion of the Soul to look at the print

Rick Crammond 2:04:37

we have a hand up here but before we get to Hussein. I'd like to deal with a question from Christiane and the chat and similar question. In the q&a, which is about the physicality to Christiane in the chat says I have cells which are informed with brutal anger and as a result I can no longer reach myself positively. This is a translation rough translation of the German by the way also vitamins etc nothing works anymore Can I lovingly cleanse my cells? Can I use the use it to reach other people? And a similar question from Christina in the q&a Hello Is it a procedure that heals also physical problems by balancing the fields

Mr. Keshe 2:05:43

we are not this is not medical system with our field processing systems are always said we are not doctors. We haven't made many mistakes we have made universal system to

balance field and you have to find that balance within maybe two solar solar physicality. Maybe as the guy said is anger when he goes to the first presetting or going into the system he find out where the problem is. He realizes it and then go into the system he handles it to come out a different man it's it's not that if I go without bottleneck I'll come back with the leg on it

Mr. Keshe 2:06:39

we are not offering a health system this is a misconception we offer a system that you find your help in satisfaction of your soul. Now you can go in the system with a small castle and come up with a bigger cancer because really your physicality wants to die once you get rid of this blissful damage because you hated your son so much that you've created that prostate cancer you don't want to eat you don't want to need to hate anybody more than that. Would the system allows you to hide out was the source of the eight false or was it me wanting more and could not give and I made it to hate because then I could compare my existence and your command understanding. We are not doctors we are not altering the health system. We operate a system where if he to imbalances your energies between your soul and soul is a character disability. Unfortunately, many of you haven't understood or maybe understood. You don't have cancer in your soul. Because any ambiguity in your formation is handled accommodated and nibbling. You have that in the direction of his cattle and that's why you go through this process of IVF and cancer How many of you were born with the blood pressure? Well we know blood because you manage psychosomatic we elevated the soul so has no pressure to put nothing on the soul up with the fact that a whole lot you will learn from this technology aren't you

Mr. Keshe 2:08:40

okay, we wanted to add somebody

Q: ... Farsi ...

K- ... (2:10).

What he is asking .. is that if I have an anger emotion and I make a Gans would that emotion effect the Gans. Or if I elevate myself, or if I elevate myself and I make the GANS in a good mood, in a positive mood with wanting to help, would that make a different GANS? I said, yes, it does.

Your emotion affects the GANS as you make. ... I always say, and people who've been around me, I don't make systems, I don't make Gans's if I don't feel correct. I don't hug my children, if I don't feel correct. I don't get involved in something, if it doesn't feel good for me to do. Because I pass that emotion to them, they're another Gans, they're another, feeling, they're another emotion. This is what a lot of people do not understand. I refuse to hold my children when position, which I take on them, because as a father, I have to give. This brings a lot of stress to me.

Of course we do, because it's another Gans. (2:12). It's the same Gans, it's the same child in half an hour, in an hour, and next day that stress goes, I ?? feel happiness, then I give

to them. What we make as Gans's in emotion, we make it, because we are interacting with it, affects them.

K- In Farsi ...

Q: in Farsi ... (2:14).

K- What Mr. Hassan has a second question, he says, with the knowledge you give, that can be used by military, against another life, what guarantees do we have, that it will not be done? I said I gave that promise with my soul, that's the only guarantee.

Any other question

K This is a prerequisite condition. When I went to Iran in June 2008. I did not jump into bed with the Iranian government. I refused, and I just explained to them, and then they saw the beauty in it. Let me explain to you a historical point from the Keshe Foundation.

[HERE >>](#)

I was invited by the Korean government, to go to Korea April, May. I traveled to Korea to do some of the leadership of Korea, South Korea. An accident happened. I had an accent I had to go through an operation and I had to leave Seoul back to Europe because of the accident. Prior to my leaving the head of American naval forces in South Korea, which is responsible for protection of this data, South Korea, called me in a safe bet, and some sketchy are leaving tomorrow. You cannot make till you meet with us.

They asked me to attend a hotel called Hamilton proton in Seoul. Those of you who know so is a military headquarters after Cambodia called American forces. I attended a meeting in Seoul. And they asked for my translator to be removed. They wanted to meet one to one abroad, some of the leading scientists from American intelligence named the naval forces Pentagon interval, at a long discussion, I explained to them if I give you the knowledge, you will use it against humanity. And this cannot be done. The head of American forces explained to me very simple way Mr. Kesh, you cannot take this technology to Iraq. I said to him, I have not been to Iran for 33 years. And there is no intention, but not my nation, immediate. And I will not betray my niche. But the haven't been for 33 years. He said we just advise you to not share this technology with Iran is not good for you. That was in April, I returned back because of the MIS operation in Seoul by the military. I was operating the military hospital in the deep basement of operating rooms in a hospital. They had to do a small operation back again, on my foot in Belgium. At that point, I needed my passport or my birth certificate for registration of documents. I've never been to the Iranian embassy for years. I went to the embassy. It Russel asking for a birth certificate not knowing anything else. As I walked in them, see I pay the fee. The gentleman said to me, excuse me, can you wait a second? There is something we have to tell you is a clinical tool, the back door upstairs Ambassador wants to reach. I said I'm just keeping my birth certificate. He said we cannot give you a birth certificate. You have to live with our best. I met with a Rena Buster in Boston. He explained to me

that the government of Iran recalls in back to Iran to develop my technology. I said I'll think about it. Let's set up three teams to get me attracted back to Iran in time to get mine because it was important for me to get my person prepared for what I wanted to do. But not one of these teams was headed by Mr. Mohammed soldier who became the Iranian Ambassador to Moscow. As I went back to Iran later on, he asked Ayatollah Khomeini in prison. I asked him if he can get attached to Iran, give me what you like. But when I arrived in Tehran, they explained to me that he wished to become an ambassador to Moscow isn't nanotechnologies. He was taking my technology and coding into the minion language. That's why Iran became heading the technology in the world for 10 years. I think they shouldn't really evolve. The quality going back. I found myself on the sixth of June, a month later in terror in a way to get my bed. It on My arrival, I was put on a high level national security protection, I was given a floor and top hotel in Iran emptied on the only person there. They emptied even the floor below, on the 14th floor. And on the next day of arrival, I knew this hotel was out by one o'clock in the morning in a hotel. I lived in that area. I was brought up I knew the hotel I used to go there for breakfast with my father, the exhale Totality era. And in that process are arriving, they asked me to go to a meeting to meet a welcoming party back to Iran.

Mr. Keshe 2:19:53

They wanted me for a meeting. The next day I attended a meeting there were seven people sitting in the room. by Dr. I came to know, the head, the Chancellor's of the five leading universities in Europe, one being shaped and on University, the azaad and others. They asked me to explain what I have discovered they want to understand. They had the Blackboard and everything like in the room, I went for a meeting, but it turned out to be an interrogation, I call it scientific base. I explained to them how the gravity is created, what we think it is and how it is. And we are setting up to build up reactors to confirm it, we have built some systems. Anyway, this discussion goes up about two or three hours since the lunchtime. We went on the lunch table. And they knew exactly what I loved in the real world. It was just exactly they were trying to get me to my stomach. And then the seven people start introducing themselves, the head of the opposite of Iran, President, delegation from the oxides are coming up around the five Chancellor's or the rhenium top universities. Explain to me, we are here to assess if we get the three words right from the five Chancellor's, you'll stay with develop. You have discovered the gravity and other technologies. If we can't wait to be thank you for coming to Iran. And while we were having lunch and we'll table one of the proposers was bending next to the table saying is praised was eating and always whatever, they start doing a what? One by one, the first one said, you have discovered the gravity, I salute you from accept you accept your technology, you have discovered I got the water. Second, I wonder what's the third I got the word from the fourth, the fifth on the head of the of the dioses. And Mr. Kesh, you have discovered, and you have brought great grace. But I'm retiring next month, if I accept you, I have to stay the university. But you have four and a half, because the five if I give, you have to stay, because I'm responsible for you. And he had to say, because he became responsible for me. We set out to do the development of the one you see now as part of the our Defense University, in his program, whatever it is that now it's been the nose medium, or the COVID military papers in 10th of last year that upon social technology, you don't complain about the 10 years that they receive such technology

from the the beauty of it was that Americans months before new irradiance and set up to capture me to take me back to you. And you need to be captured our beautiful willingness to get better, we have brought that knowledge back to our world leaders are aware of each other's action, or what it is no one's going to do with each other because they know each other. So we're on track within the program of intelligence there is for us not to fall within these gaps and make sure the target is and when I reached when I came to an agreement on that lunch table, I said to the representative the harmony of your optimism, Office of their research and development. Presidential officer. I want a signed contract. I'm not here getting excited just because you allow me to develop. I want to sign a great contract and my technology will not be used against humanity. And Mitel. It took us three weeks to sign this contract. They wrote it and brought it back. You see in in the movies, people come with a handcuff with a change in suitcase. We had that because it was carried on the laptop. It wasn't written. They bring the laptop, they just I just what I wanted to pose back to them. And they had a huge problem. And the wait for us is so good. So they had to do the English translation to consider to read what they were told I could read. And then after three weeks, we read.

Mr. Keshe 2:24:31

It was sent signed by Amelie which was head of the research. And then it was sent to the Iranian parliament security to be agreed and registered because I wanted the nation to be agreed to it, not the president. So I am not talking about the piece today, just because it suits I live with the Office of Iranian nature with a signatory from the opposite of how many of Iran through the Iranian parliament. And the strange thing is when we signed him, they said, We need to get it indoors. Can we have it back because not assigned. They never put it back. Because they said beside ourselves to it, we don't want this to be leaked outside. Now you understand that we are committed to peace in writing with Iran. If they really need to ship based on or they do not want to see what we did with the race of Moses, you see them no matter around the world for centuries. Indian leadership cannot be to what their side results. Especially it how many of you? We signed an agreement with stickability. The knowledge of Keshe Foundation but not has to be to show its beauty and nothing else.

Mr. Keshe 2:26:09

Any other questions?

Rick Crammond 2:26:14

Okay, we have three hands up here from Thomas as our and Mosfeq. Thomas, if you can go first.

Mr. Keshe 2:26:25

By the way, I've got my birth certificate after I signed the contract. Now, you know.

Ed Weatherall 2:26:33

Good morning, Mr. Kay. This is Edie from Indiana. My name is is Thomas on the this particular sign in but anyway, I'm wondering, when do you expect there to be this to be available in the Arizona facility,

Mr. Keshe 2:26:54

we don't know we don't know we have to come to an agreement with the American government. This a high intellectual system, we have to come to an agreement with a provider. John nose, the first person I called to tell him that the system is ready to go his job. I work very closely with John, of course, then I inform the radiant head of the team the Chinese know. And that's how it is. We do not expect any movement of the theology. The 10 units which are built for Arizona I talked to John I'm going to use them here in Oregon inlet still is that John is fully aware of my work by sometimes talk to him on a daily basis. He is not only that application relation us he is the CEO of democracy Corporation, which is a presentation to Keshe Foundation in industrial side. So we we we don't expect anything so honestly reach understanding that amazing government in bringing peace. We're not looking for taking sanctions off the peace now it's become more complicated with Russia and Ukraine and Iran is become a big mess.

Ed Weatherall 2:28:13

Yeah, so it is it dependent? Mostly on the political situation, as you just said, or

Mr. Keshe 2:28:19

no, no, no, no, no, no, no, no, it's not political, is not using the technology into Americans have a habit the minute they get hands on something, they weaponize it. Yes. And I think that in power, we have the same thing we didn't know till very recently, when top Keshe Foundation Knowledge Seekers was working for and how we lost, we got involved in the loss of the technology to very amazing how in past few weeks with a be understood more, that are Knowledge Seekers have been working as long as security intelligence for Americans. Yes, yeah. So we are, if we get a guarantee from Biden's office, that the technology will not be used. We haven't guarantee from by Obama. And Biden needs to be his second in command. I need the agreement with Biden and the Senate, that none of the Keshe Foundation technologies will ever be weaponized. You'll have it tomorrow. I don't care if there's a peace talk with him. Yeah, we use this to achieve that your Americans reached sort of your views brings us to the moment. We love to transfer to

Ed Weatherall 2:29:47

I think I understand. But the essence of my question was I understand that. I mean, for people the initial entrance into these units takes oversight and understand And yeah, I mean, you're gonna be there personally right? And

Mr. Keshe 2:30:04

then Monday the sixth hour will be the person because our team has to learn how to use the system, they have to adjust systems, right? And we have two three Knowledge Seekers who have built a system. And they know if there's an adjustment if there is a failure, you have to understand there is a big problem we expect a big problem we are we are interfacing plasma technology with a matter technology you understand? Yes, and it takes a lot of some of you might walk in with a energy which is not fitting or the system cannot absorb and change something you understand, we have to understand where the change comes from. This is all the things we are looking for

Ed Weatherall 2:30:53

yesterday and so I understand that the oversight is critical especially in the initial stages till you have the 1000s of examples and feedback and everything so so how are we to duplicate this oversight in different locations,

Mr. Keshe 2:31:10

bus or truck? Okay, that's our job. That's our job to our system. So our technology to our share, just try to get into lists as many as you as you can. Okay, you go for privilege, you go for spending time to go kart nose doing whatever make that trip, add to the knowledge we need. We need to we have to collect a balance system of knowledge we cannot be all European with Africans, we need the Americans we need all of you we need the Chinese to enter the system's pardon.

Ed Weatherall 2:31:53

I'm sorry to interrupt Go ahead. This

Mr. Keshe 2:31:56

that we bring we make a system that we are now we work as one nation. And as an open nation. Before it was NASA Americans doing it that was Chinese doing it. The Russian Knowledge Seekers get yourself to live as fast as you can. Maybe through you we can reach the world leaders in Moscow is your responsibility. We have facilitated it. Knowledge Seekers in Moscow wanted to go to Tehran. You are a knowledge seeker in Ukraine knowledge because get yourself in bring us that position your Knowledge Seekers in United States get yourself to rent. Maybe through you to the essence of the soul of understanding the culture. You can reach your leaders we can change the position. We can learn something how to learn. The thing is I have the knowledge is easy for me to do. But our technicians, our scientists have to understand it that they can develop what fits the man. This is not a joke anymore. We never went in, we put the enhancement out two years ago, we never let anybody the only person who's been in Enhancement Unit SAT is the head of the Keshe Foundation. Hello. The only person we allow to sit in the operating side of the Enhancement Unit is the head of the Keshe Foundation. And you'll see her with that red dress

Mr. Keshe 2:33:40

get yourself into Legends is a must is not an option. Doesn't matter wherever you are Iranians are apps, Black White, we need this to be completed we allow 10,000 hours of it. We don't a lot of this work in China. A lot of knowledge of development of the new Enhancement Unit comes from our experience of work in China when you saw that my walk in from the wheelchair but these are totally new. You don't see any motors as you don't see what was in the space. We have broad interaction of the fields of the matter and the fields together which never been known before. Because interaction of the two brings us to what called the solar physicality. It is your responsibility to get yourself to LEDs. If you're a true knowledge arrow you see for next three months Austria is open door. They took all the krona restrictions And you saw us two years ago when we brought the president Huntsman unit how the Belgium's jumped all the way trying to block it, they

did everything and the German pit group they want to stop. But we are part of the organization we are a company we are registered we work within the limits of our license and certification. They can't do anything the devils have gone back to the origin and the name as part of people housing Germany is our responsibility to bring the sanity back to humanity give yourself any shape or form for five session 10 session one session to add to bring because there's something let me explain to all of you to understand

Mr. Keshe 2:35:48

when you come to the center as it changes when you go into the system as a Chinese you interact with the system and you remember always said once you establish on it always stays awake now the next person is an American next person's earring you all build that system because now that system has created a connection with the Chinese will be really nervous meals then we get essence without law these systems and we build new systems from them that allows the Totality of the races of the man to be this is why we asked you to come from different backgrounds of every nation to us not just because oh one Americans already been there. You're American Polish german.on is American Irish English. Different structure so this is why we established the Universal Council in the language and district. English speaking Canadian area your English speaking American the sidewalk and a pavement is the same thing but understood totally with other languages.

Ed Weatherall 2:37:25

So Mr. Kesh when we come to Lance, how long should we allocate to be there for

Mr. Keshe 2:37:33

you this site decides many times you have blocked yourself into five sessions, because you're paying for the session.

Ed Weatherall 2:37:44

So I have five sessions

Mr. Keshe 2:37:47

you will try to know the one what are the ones which let me explain to you with the tests we did in China. We did a two session today and that's the best Yeah, yeah. And I don't know one session you want to fly next session you have a cancer you want to see how it looks next session you want to feel how does it feel if you have a child with your lover or with the mother how will be that one session is you want to go and reach your body that one session you want to go to the Moon once you now want to go to the Moon and Gadhafi they happen now to repeat it is your we don't give it you are the captain. You decide where to go. Okay, thank you. You're welcome. Make as much as you can to bring this that we can bring the church have done everything possible in a physicality to be done. It's your turn to bring the rest. And we have allocated 10,000 hours. For a good collection of times we have to keep on adding to the system's make it four make it six make it 10 That 10 gives us 80 hours a day 500 Morris a week, in 10 weeks, we get the 5000 10,000 it has to be done. Our team doesn't stop we have set up the production line. And thanks to Klaus and the team behind him when they can meet it now they're learning

more tosses of the system as you make your way to events. If you're there to change the manatee in itself and the rest. We don't apart. This is knowledge. And don't come with expectation come there to add to the world

Ed Weatherall 2:39:40
thank you very much. I'm done Rick. Okay, thank

Rick Crammond 2:39:49
you, Ed. Ready for another question? Mr. Kesh? Yep. Can we have as are now and then Mosfeq and At work

Azar 2:40:02
with Money Mustache. This question was placed in the chat by Mason from Elon, but you didn't see it. So he asked me to ask you, on June 6, the first day is it going to be televised or just going to be private,

Mr. Keshe 2:40:17
we keep everything private, we try to keep everything out. So we know exactly where we are. Maybe we share with you in the Pantel. There's some information. But we have to understand, we don't want to make celebrities other people put them under pressure. You have to understand when we put somebody out, the habit of Knowledge Seekers on doors in Germany and Belgium is to attack them or to pressurize them all to interest them. I want to know one more. What if you look at the registration, you sign an agreement that no information can put out except Keshe Foundation clear TV and plasma times that we do our very this we have to look for collective if you come back with a Sun from Mars, you cannot show it we don't confiscate it probably ask the police to hand it over. We can get it confirmed where it comes from, what is the content if you come back with some liquidity never seen before, we would like to test it to you. Oh, I went to a bar I just happened to land somewhere by mistake abroad something maybe come back with an animal we don't know.

Mr. Keshe 2:41:33
This is the reality of the new space travel. The first time you take off, you don't land properly. Or the flight doesn't go according to what you wish. You have to learn it you have to adjust it how to extend the soul. Sometimes the first test the first ride is most dangerous when I've done that. I went to become a pilot that began in London when I was a student the first flight out came across a jumbo jet coming from the teacher said let it go I have to take over. It didn't go as well as I thought I thought well my job is to get into it some. So you come in to experience and to add we keep it we try not to create celebrities that then some people then add etc to other things to it and some people don't want in house enough you will come back with material if you've managed to bring that essence there's a technique to it. Where you bringing her Saba concentrate not just because you wanted to bring otherwise you won't see. You drag a girl to your mouth say this is my girlfriend. She has to walk in as a girlfriend. As simple as that.

Azar 2:43:03

Mr. Kesh. This is my question. Is it possible to see the Creator?

Mr. Keshe 2:43:09

If you understand it, yes. There is no limitation to this systems. If you wish to see Christ, you will see the crime. And asking did the Last Supper happened was a session of price on Thursday? And I was explaining to a lot of people's close to me. What, how and the reason he was put on the cross. And He said, Why don't they tell us this in Christianity because if they tell you then you will not be Christian with you. Why the Romans put the Christ on the cross because the Jews asked for it. I was going to have an evolution because Jesus loved women. And he had to win the pleasure with the richest woman in Palestine. And they wanted to see the end of the USO answer. They couldn't stop they did the deal with revolution when you put them all across them across their salaries across our country price went across the process of the physicality to go

Azar 2:44:22

mystification mera mera translate this in falsey for them the answer you had for Coronavirus.

Mr. Keshe 2:44:28

Do it. Do it in a Wednesday.

Azar 2:44:32

Thank you. Okay. Thank you.

Rick Crammond 2:44:41

Okay, moving into Mosfeq now.

Mosfeq 2:44:48

Hello, Mr. Kesh. My question is concerning you mentioned about something you mentioned earlier about, there is a fly in the universe or at least at the sanitary towels. Now.

Mr. Keshe 2:45:04

Somebody's seen that. Yeah, fix that. So you Knowledge Seekers without knowing it, you're fixing it.

Mosfeq 2:45:15

Okay, so then there is no really no question because I was wondering whether this will help in achieving that goal? Yes,

Mr. Keshe 2:45:23

partially you can, but it has to be the Soul of the Man is connected to the solar, the planet to be able to do it. Somebody from Planet Zeus cannot do it for you, because they don't have that quality.

Mosfeq 2:45:35

So, then I have another question. As I have hinted earlier, it see it appears that my so I can travel with my soul at a specific location. I mean, it's just a foretaste of it. So does, what difference does this spaceship system bring with respect to what one can do with the console, the travelers Sue's

Mr. Keshe 2:46:07

versus what we said is for those who cannot do if you have managed to achieve, and you can get to that point, we don't need if you have a private jet when you go into public play.

Mosfeq 2:46:30

Thank you, thank you.

Mr. Keshe 2:46:34

But the thing is, sometimes you think you have a private jet. That's other point to

Mr. Keshe 2:46:43

any other question, or shall we call it a day?

Rick Crammond 2:46:50

Oh, we need to get got to get in here for sure.

Mr. Keshe 2:46:54

Yep. And we know what is going to ask.

Dr. Gatua 2:47:01

Good day, Mr. Cash. How are you?

Mr. Keshe 2:47:03

Not too bad. Thank you. It's

Dr. Gatua 2:47:06

good. Now that you know what I'm going to ask I'm not going to ask care, because it's already known. But then I just

Mr. Keshe 2:47:13

have to tell the other people.

Dr. Gatua 2:47:18

Well, I was going to, before I ask, I really wanted to thank you very much for bringing the whole world to, and probably even beyond the whole world, to this condition, to this evolution of science. And we very much look forward to evolving our souls with the technology. Now the question that was the part you knew was, of course, when do we expect it in Kenya?

Mr. Keshe 2:47:52

Thank you very well, when the Iranians have it whenever it comes, however, the Kenyans or even the Chinese have. It's very interesting. Let me see if she's still here. Yeah, Wang Lin is still here. We mean, would you like to explain your AdWords? I'll do it. And then you can call limit or say quite a few years ago, when Lina and I, we were invited to go to hotel to meet with Chinese structure. And then we were supposed to go in the morning to meet the Chinese space people for their space flights. The person responsible for national security was supposed to take us something you haven't he didn't take us. And then he said, what happened? We came all the way to meet with these people. He said, they have a problem. They don't want you to see they don't want to meet. But they're asking if you can give them the build the system, they build the flight system, your design. They don't have the fuel combination. Do you mind if you could give them the fuel combination that they can carry on? And I laughed, I thought this is a big joke. I said, So if they'd been into here find a fuel as well. So they must have tried many fuels, but they haven't understood what fuel they need to do with the uranium. And the reasons are not sharing it. It's very amazing how they're not sharing it. I think they shared it with a child with the Russians in part part of the technology. And I laughed and said, so they're only waiting for us to show their superiority once they have the view. And now is how long as it's three years now. But are you there? Do you remember? How long? How long is it three years ago? They still haven't found the fuel, they're still working on it? (2:50).

WL: Maybe five years, but I recently I heard that China has, like, very successful. Like a anti-detection. flight, like to influence RSA, the flight from Japan, American military base. I think China has, has a lot of.

K- Yeah, but what I'm talking about when they asked us No, I'm talking when they asked us to see the space people, and then they asked if we can you give the fuel.? Yeah. Yes, this is what it is. Once we give the technology, it will go to all the nations. It will go to all the man. What we need to perfect it, that when we go, there is no loop hole in it, there is nothing missing. That's what it is.

You add ambassadors of your nations. We went to the governments, we gave the key to the ambassadors. Now, you come to bring that key back to us, that you can give it to your nation and to the human race. I'll explain to you how it works very soon.

Make your way, you went. If you were Muslim, you had to go, make your way to Mecca for pilgrimage. If you're a Christians, you have to make it go to see whatever. If you're a Jew, you have to go to see the Wall. Make your way to Linz, and build that system. It's your obligation, for change, for what we have to do. Then you understand it when you go in it. When you come out of it you see it, you feel it. (2:52) Then you see if the change comes with it, and how much we start changing from next two weeks in the structure of the world.

Some of you, through your soul ?? seek the world leaders and you enlighten their souls and how we see things will change. And it's all accidentally happening. No, because you've managed to convey the message. And it was heard, and it was acted on.

Any other question.

Q; ... Now my final question is, do you have any update on JCPOA (5Plus1)? And when it will materialize ??

K- No, it doesn't really matter anymore? Doesn't matter anymore. I told you two or three days ago to one of KS. Because the last two years, I spent too much time getting involved, raising funds to build the factories for it. It will come on its own, it will come on its own. We will see it coming through.

Instead of wasting time to change the past. let's build the future. The past will change on its own. ?? becomes ?? not even remembered.

Any other question? We call it a day.

Thank you very much for being here. And I hope we see at least 10 of you in Linz on Monday. You are the captains, without you we can't fly. And I'm sure many of more of you will come to this to add to that knowledge.

Germans have huge responsibility for peace and T

There is a very specific way, we're looking at a specific reason why we are in Austria. I will explain that in the future. It's not just by accident. The Germans have a huge responsibility in the direction of the process of peace and development of this technology. (2:54). We are not here by just accident. We are here by purpose. And the German community has a huge responsibility in this respect. Make sure that the process is completed, and as you come to see the exhibition. As it's your responsibility to see the rest, which we ask you to complete it to. You will understand through your soul what we mean and what has to be done.

Thank you very much. And thank you to all of you, who are and been around, and we'll see the change. I have given you and knowledge that the whole of universe is crying, and being, why mankind with all the wrongs they've done, have been given such a gift.

We have a lot to deal with them, to convince them that it was needed to be done this way. It's my job. ... I'm sure we'll see a beautiful times for mankind starting from the 6th June. Thank you very much Rick, for being there all the time, Klaus and the rest of the KF team around it.

R: Thank you very much, Mr. Keshe and we look forward to the changes coming up and future guidance as we move along to then, through this next step.

Flight Test Announcement. Saturday, May 2820 22.
